PROFESSIONAL SUMMARY

Cybersecurity engineering student at ENSAM Casablanca with a Purple Team mindset, drawn to the technical depth of both offense and defense. Passionate about understanding how attacks work at a technical level, because that is what makes defense meaningful. Driven by hands-on learning, active CTF participation, and a genuine curiosity about the intersection of AI and threat detection.

EXPERIENCE

Cybersecurity Automation Intern Aug – Oct 2025
Python · DefectDojo · REST API

iRevolution — Remote

- ▶ Automated false positive detection and filtering in DefectDojo using Python and the REST API, reducing manual triage workload.

Cybersecurity Fellow Aug – Nov 2025
Virtual Lab · MITRE ATT&CK

Buildables Fellowship — Remote

- ▶ Full-cycle incident simulation: exploitation (Red), investigation (Blue), and remediation report mapped to MITRE ATT&CK.

Cybersecurity Engineering Intern Jun – Jul 2025
Python · Flask · OpenVAS · Docker

JAAG Advisory — Casablanca

- ▶ Built **AutoSecBot**: Vulnerability scanner with a Flask dashboard and exportable reports.
- ▶ Conducted security posture assessments and drafted prioritized remediation recommendations.

Cybersecurity & Forensics Intern Apr – Jun 2025
Kali Linux · Metasploit

Cyber Secured India — Remote

- ▶ Trained in digital forensics, vulnerability analysis, and controlled exploitation in isolated lab environments.

PROJECTS

X-NetGuard — Distributed SOC 2025
Wazuh · Suricata · OPNsense · Tailscale

Guided project · XAI-Tech

- ▶ Designed and deployed a distributed SOC with mesh VPN (Tailscale), Wazuh/Suricata alert correlation, and OPNsense perimeter filtering.

Botnet Classification via DNS Analysis 2025
Python · Random Forest · Scikit-learn

Self-directed academic project

- ▶ developed a Machine Learning (ML) model to detect botnet activity by analyzing behavioral and statistical features extracted from DNS traffic, moving beyond simple signature-based detection.

SIEM Analysis Dashboard 2025
Python · Streamlit · Scikit-learn

Self-directed academic project

- ▶ Supervised ML classifier for log triage (normal vs. malicious) with a Streamlit interface for raw log import, scoring, and report export.

EDUCATION

State Engineering Degree — Cybersecurity & Cloud · ENSAM Casablanca	2024 – 2027
Integrated Engineering Preparatory Program · ENSAM Casablanca	2022 – 2024
Baccalauréat — Mathematical Sciences, Highest Honors	2022

TECHNICAL SKILLS

Offensive / Red	Reverse Engineering, Malware Analysis, Metasploit, Kali Linux, Burp Suite, Privilege Escalation
Defensive / Blue	Wazuh (SIEM), Suricata (IDS), OPNsense, FortiGate, FortiWeb, Proxmox, Docker
Forensics	Digital Forensics, Wireshark, MITRE ATT&CK
Development	Python (automation, ML), Flask, Bash, Java (Spring Boot), Git, Streamlit
Networking	TCP/IP, DNS Security, VLANs, VPN, Tailscale, OSI Model

CERTIFICATIONS

FCP – SASE & FortiGate Administrator (Fortinet)	Ethical Hacker (Cisco)
FortiWeb & FortiAnalyzer Analyst (<i>in progress</i>)	OPSWAT Security Associate Suite
MongoDB · Cisco CLA (C Programming)	CTF: active team competitions

LANGUAGES & INTERESTS

Languages: Arabic (Native) · French (C1) · English (C1)	Interests: Bug Bounty (active learning) · Culinary Arts
